

## **Removable Shelf Inserts and Dividers**

I have worked for the United States Postal Service for nearly seven years as a postal worker. I have loaded and reloaded various types of rolling postal carriers.

The General Purpose Mailing Container or GMP for short, is a rolling verticle mail carrier that measures 42x29x64. The eastern coastal verticle mail carrier measures 42x29x70.

The General Purpose Mailing Containers are used for transporting, staging, disributing, organization of mail for both in-plant and between postal facilities.

When loaded these GMP's are sometimes under loaded. When I see several of these GMP's loaded onto our postal trucks a quarter or half full, this in my opinion is a terrible waste of space. Because of this wasteful non use of space in our General Purpose Mailing Containers I decided to do something about it.

Within days I came up with this idea of removable shelves and dividers.

Useing these removable shelves and dividers, postal materials such as postal tubs of mail, trays of mail, packages large or small, long mailing tubes, magazines, newspapers, or any other types of mailing materials can be placed within the same GMP separately, FULL!

Removable shelf inserts and dividers are made of strong plastic which are lightweight, portable, and durable.

## Removable Shelf & Divider Setup

Setup for the General Purpose Mailing Containers is fast and easy. For GMP's with builded in middle shelves just form a bridge or stand and place it either on top or underneath the GMP. Insert the dividers in any combination so desired.

For GMP's without middle shelves, build the same bridge or stand but the bridge will now form the middle shelf. Insert dividers in any combination so desired.

### Comments:

I filed this patent application myself without the help of an patent attorney because in 1995 I consulted a patent attorney about an idea of mine of a multi-sport training net. I paid his firm 4,200 dollars to setup my patent application. To this day I'm very unhappy with the results. I have no idea what happen to that patent application. If you would check your files was a patent application granted to me in 1996. Is it still active? I tried to sell my sports training net idea to several sports companies and they know of my idea. Has any sports company filed a claim similar to my multi-sport training net idea from 1996 to the present? If I can, can I still cliam this idea? I am sending you my client's copy with a return mailing envelope paid by me. Could you please let me know about this claim of mine and return my client's copy.

### In closing

If there's any additional information, fees or one of the documents has been filed wrong, please let me know by email below and I will either send more money, make corrections or ad more information. I have made several copies of each patent document and I can send you any copy that needs to be corrected.
